Re: PM 1412
Putrescine N-Methyltransferase

Dear Gentlemen:

Thank you for your letter dated May 18, 1992.

Please proceed to prepare a proposed response for our review.

We have copied the inventors of the Office Action and your report letter so that should you need their input, they will be informed.

Please feel free to contact the inventors directly on this matter.

Please consider whether any dependent claims might be added to the application, whose recitations would help further distinguish over the applied references.

Sincerely,

Charles E. B. Glenn
